1

The Human Advantage in an Artificial World

As AI gets smarter, faster, and more capable, the greatest competitive advantage may be the one thing technology can't replace: being human.

Michael challenges audiences to strengthen the skills that become more valuable as technology advances—communication, trust, influence, relationships, and the ability to truly connect.

This keynote helps people discover how to remain visible, valuable, and indispensable in an increasingly artificial world.

2

Communicate to Connect

We communicate all day—but that doesn't mean we're connecting. Michael reveals why the most influential leaders don't simply deliver information; they know how to make people feel seen, heard, understood, and valued.

Audiences learn how intentional communication builds trust, strengthens relationships, reduces costly misunderstandings, and moves people, ideas, and organizations forward.

3

When Life says you Can't

How to Keep Moving When the Path You Planned Disappears

From being on his own at 15 to setbacks in business and life, Michael Fineman knows what it means to keep moving when life gives you every reason to stop.

This powerful, personal message challenges audiences to refuse to let what happened to them determine what's possible for them—and discover the strength to keep moving forward.
